

GAURAV SINGH

Quality Assurance Engineer | Manual Testing | Automation Exposure

+91 88968 81234 | gauravsinghsms15@gmail.com | LinkedIn: <https://www.linkedin.com/in/gaurav-singh-up>

PROFESSIONAL SUMMARY

Quality Assurance Engineer with around 5 years of experience in manual and automation testing for Web, SaaS, AI/ML & IoT platforms. Experienced in UI automation using Cypress, API automation using REST Assured and Postman, backend validation, and performance testing using JMeter and Locust. Hands-on exposure to Python scripting, LLM-based validation workflows, and API load testing - including high-volume image upload scenarios for Computer Vision APIs. Proficient in Grafana for production monitoring and issue investigation. Exposure to SAP BTP integration and API-based Master data sync testing. Experienced in Agile/Scrum delivery with active participation in sprint ceremonies. Proven track record of executing 900+ test cases, improving regression coverage, and reducing production defect escape rate.

CORE SKILLS

Manual Testing | Mobile Application Testing | UI Automation (Cypress, Selenium) | API Automation (REST-assured, Postman) | Performance Testing (JMeter) | Backend Validation | Apache Kafka (Event-driven log validation) | Azure DevOps | CI/CD | Git | Agile | Cloud Testing

WORK EXPERIENCE

Spraxa Solutions Pvt. Ltd., Noida, India

Quality Assurance Engineer | Mar 2021 – Present

- Led manual and automation QA initiatives for AI and IoT-based SaaS platforms ensuring functional stability and system performance.
- Designed and executed functional, regression, integration, and exploratory test cases across web and cloud applications.
- Developed and maintained UI automation framework using Cypress for business workflows and Playbook.
- Built API automation suites using REST-assured covering request/response validation, authentication, schema validation, and integration scenarios.
- Performed API performance testing using JMeter to evaluate system behavior during bulk image uploads (500+ images scenario).
- Benchmarked Computer Vision API performance under high-volume workloads and supported optimization efforts with development teams.
- Integrated automated test suites with Jenkins and Azure DevOps CI/CD pipelines.
- Performed database validation using SQL queries to verify backend data integrity.
- SAP BTP integrations, particularly around API-based Master data & Order summery sync between systems.

KEY PROJECTS

CoolR – IoT Monitoring Platform | Oct 2022 – Present

- Executed manual and automated testing for real-time IoT dashboards and AI-based telemetry systems.
- Implemented Cypress-based UI automation for user workflows and ordering modules.
- Developed REST API automation and performed integration validation across microservices.
- Conducted JMeter-based load testing to assess API stability during bulk image processing scenarios.
- Performed event-driven validation by executing device commands sequentially and analyzing Kafka-triggered backend logs to ensure correct event sequencing, payload structure, and telemetry consistency.
- Collaborated with developers to improve API handling and system stability under load conditions.

Baxter - Hillrom Helion Viewer Suite | Apr 2022 – Sep 2022

- Performed manual functional, UI, and integration testing across Windows, macOS, and Linux environments.
- Validated healthcare imaging workflows ensuring compliance and high availability on Web and Mobile application.

TLS Mobile – Logistics Platform | Apr 2022 – May 2022

- Performed logic and rule validation to verify correctness of system-generated outputs against defined requirements.
- Compared UI results with backend API responses and database records to identify mismatches and incorrect outcomes.
- Investigated false positives, false negatives, and calculation discrepancies in rule-driven workflows.
- Prepared internal validation notes and evidence documents to support defect resolution.

RealWave – Intelligent Video Surveillance | Mar 2021 – Mar 2022

- Executed UAT, functional, and integration testing ensuring seamless data flow between video analytics and POS systems.
- Developed backend automation workflows using Selenium to validate server-side processes.
- Performed API validation and database verification using SQL queries.
- Collaborated with developers to troubleshoot AI detection and live streaming issues.

EDUCATION

- MCA | Accurate Institute of Management & Technology (AKTU) | 2020
- BCA | School of Management Sciences (MGKVP)| 2018

CERTIFICATIONS

- AWS: DevOps, Machine Learning (Comprehend), S3 Security
- Cyber Security | NIELIT CCC
- Generative AI Testing & Prompt Engineering & Scrum & Agile QA Practices
